About Solaris Investment Management

By Denis Donohue, Managing Director

Welcome to Solaris!

Solaris is a boutique funds manager determined to provide our investors with an exceptional investment experience.

Our team has a demonstrated investment management and performance history; we are cohesive, collegiate and passionate about what we do. We are proud of our tried and tested processes forged over many years of investment and industry practice.

We live by our investment principles and believe our dedicated, career analysts provide excellent results when they are empowered and rewarded as portfolio managers. Only bottom-up stock picking is used to build your portfolio. Our analysts have intimate company knowledge and as a result make effective specialist portfolio managers for their sectors. Quite simply, we are focussed on exceeding Benchmark returns for our investors.

Solaris is invigorated and brighter than ever before so there has never been a better time to benefit from our 'perfectly aligned' investment management. I invite you to invest with confidence, knowing your funds are managed by knowledgeable, skilled professionals intent on delivering an optimal investment experience.

About Solaris

Solaris Investment Management Limited ('Solaris') is a boutique Australian owned, Australian equities Fund Manager. Solaris' employees are majority equity partners in the business, with the remainder owned by Pinnacle Investment Management Limited ('Pinnacle'). Pinnacle is a boutique funds management group, majority owned by Wilson HTM Investment Group Ltd.

The Solaris team is made up of 9 experienced investment professionals who have an average investment experience of 15 years each. For further details on the Solaris team, please refer to pages 6 to 11.

Investment Style

We have no consistent bias towards value or growth stocks therefore our style can be described as 'style-neutral'.

Investment Principles

- We pick stocks using fundamental analysis to exploit market inefficiencies in forecasts and valuations.
- Fundamental analysis is optimised by analysts being empowered and rewarded as portfolio managers.
- Analyst management of the portfolio is the best way to capture identified inefficiencies.
- We believe that active management can provide better returns than passive investment.
- To achieve strong returns, positions may be taken which deviate from the benchmark portfolio, through skilful stock selection.
- Our investment decisions are supported by detailed analysis of the securities and key financial markets, with an eye on global perspective.
- We apply strict risk controls to minimise the downside risk.
- Stock selection is our main area of expertise.

It is essential that all company models utilise the same global assumption set. To this end, all models draw their global assumptions (i.e. interest rates, currencies etc) from a common database of assumptions. To avoid top-down overlays influencing the bottom-up portfolio construction process, these assumptions generally reflect consensus forecasts.

Solaris 3-Step System

Risk Screening

All stocks listed on the Australian Securities Exchange are screened for litigatory, liquidity, geopolitical, ESG issues and financial risk factors, to arrive at 200-250 companies which we consider satisfactory for investment purposes (the Investable Universe).

Expected Returns

The Investable Universe is analysed via valuations and detailed modelling of all companies. A minimum of 4 years of cash flows is used to value each company. We use both qualitative and quantitative techniques to calculate each company's Expected Total Returns ('ETR').

Portfolio Construction

The ETRs of all analysts' stocks are collated in the Expected Returns Database ('ERD') and a market capitalisation weighted average Market Return ('MR') is derived.

The analyst, acting as the sector-specialist portfolio manager, establishes overweight or underweight positions in the portfolio based upon each stock's excess return.

A critical factor in the Solaris investment process is that the analysts who analyse the companies are also the portfolio managers for those companies. In other words, the analysts decide if the company they analyse should go into the portfolio.
